FORM 2
MCH BUDGET DETAILS FOR FY 2011

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: GA

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 16,284,772

A.Preventive and primary care for children:

\$ 7,814,816 (47.99%)

B.Children with special health care needs:

\$ 7,386,969 (45.36%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 699,732 (4.3%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 0

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 131,621,290

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 190,934,182

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 18,316,838

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 36,079,622

\$ 340,872,310

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 357,157,082

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 100,000

c. CISS: \$ 140,000

d. Abstinence Education: \$ 0

e. Healthy Start: \$ 3,000,000

f. EMSC: \$ 150,000

g. WIC: \$ 274,633,624

h. AIDS: \$ 0

i. CDC: \$ 1,367,647

j. Education: \$ 14,735,296

k. Other: \$

ARRA \$ 15,925,491

\$

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 310,052,058

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 667,209,140

Screening Programs for Older Children & Women (Specify Tests by name)
--

- | |
|--|
| (1) Use occurrent births as denominator.
(2) Report only those from resident births.
(3) Use number of confirmed cases as denominator. |
|--|

FORM NOTES FOR FORM 6

Resident births as reported by vital statistics is the number reported in Column A. The number receiving at least one screen does not include screening reports from military birthing facilities. For Column D, the number of confirmed cases is the denominator (Column C).

FIELD LEVEL NOTES

None

FORM 7
NUMBER OF INDIVIDUALS SERVED (UNDUPLICATED) UNDER TITLE V
(BY CLASS OF INDIVIDUALS AND PERCENT OF HEALTH COVERAGE)

[Sec. 506(a)(2)(A)(i-ii)]

STATE: GA

Reporting Year: 2007

Types of Individuals Served	TITLE V	PRIMARY SOURCES OF COVERAGE				
	(A) Total Served	(B) Title XIX %	(C) Title XXI %	(D) Private/Other %	(E) None %	(F) Unknown %
Pregnant Women	73,134	56.6	0.0	24.4	19.0	0.0
Infants < 1 year old	150,804	57.3	0.0	28.0	14.7	0.0
Children 1 to 22 years old	372,849	66.3	0.0	22.5	11.2	0.0
Children with Special Healthcare Needs	35,049	75.2	3.7	18.0	3.1	0.0
Others	0	0.0	0.0	0.0	0.0	0.0
TOTAL	631,836					

FORM NOTES FOR FORM 7

Pregnant Women: Counts come from Babies Born Healthy Program, Perinatal Center Deliveries, and WIC prenatal clients. These data sets are not linked and cannot be deduplicated. The result is potential duplication in the client count. All women served by Babies Born Healthy are uninsured. Facility specific percentages of delivery pay sources were applied to facility specific counts from the birth file. WIC does not collect information on insurance pay source. Therefore, WIC specific pay source distributions from PRAMS were applied to the WIC counts.

Infants: Counts are from resident births in the state, because all births are served by the Newborn Screening Program. Pay source is derived from delivery pay source distribution from PRAMS applied to the birth file counts.

Children: Counts are from WIC child clients (1-5 years) and Lead Screening Program. These data sets are not linked and cannot be deduplicated. The result is potential duplication in the client count. The Lead Program contains pay source information, but for WIC, delivery pay source distributions from PRAMS were applied.

CSHCN: Counts come from the Lead Screening Program, Children with Special Health Care Needs, Family Support Services, Case Management, Babies Can't Wait, and Respite Care. These data sets are not linked and cannot be deduplicated. The result is potential duplication in the client count. For family support services and case management, only a total could be provided. The distribution for Respite Care was applied to these counts. For CSHCN, unknowns were distributed in the following manner: 5% of the total was placed in uninsured, based on National Survey of Children with Special Healthcare Needs uninsured estimates for Georgia. The remaining counts were distributed according to their proportions on known pay source of care.

All data are from calendar year 2007, except for WIC and the Lead Screening Program. The 2008 WIC data was used because this is the most recent year available for which there is high confidence in the unduplicated counts. Similarly, the Lead Screening Program is 2009 data, because in 2009 the program had significantly more complete counting than in preceding years, and is a more accurate representation of children served. For WIC and Lead Program counts, the assumption is that the 2008/2009 counts are not far off from the 2007 counts of participants in these programs.

FIELD LEVEL NOTES

1. **Section Number:** Form7_Main

Field Name: AllOthers_TS

Row Name: Others

Column Name: Title V Total Served

Year: 2011

Field Note:

Georgia Title V currently does not serve anyone outside women, infants, children, and children with special health care needs. Therefore, there are no "others" to report.

FORM NOTES FOR FORM 8

None

FIELD LEVEL NOTES

- 1. Section Number:** Form8_I. Unduplicated Count By Race
Field Name: DeliveriesTotal_All
Row Name: Total Deliveries in State
Column Name: Total All Races
Year: 2011
Field Note:
The total resident delivery counts are from the Georgia Natality File.
- 2. Section Number:** Form8_I. Unduplicated Count By Race
Field Name: DeliveriesTitleV_All
Row Name: Title V Served
Column Name: Total All Races
Year: 2011
Field Note:
The counts are based on deliveries at Perinatal Centers and among Babies Born Healthy participants. This is an estimate of those women who received direct services from Title V during the prenatal, intrapartum, or postpartum periods. The Regional Perinatal Centers support prenatal, intrapartum and postpartum services to high risk and underserved women. Babies Born Healthy provides prenatal care, through the health districts, to women who are less than 200% of FPL, but do not qualify for Medicaid. Babies Born Healthy data are not available by race-ethnicity. The distribution of race among Hispanic births was applied to the total of Babies Born Healthy participants to estimate the contribution of of this programs participants in the race cells.
- 3. Section Number:** Form8_I. Unduplicated Count By Race
Field Name: DeliveriesTitleXIX_All
Row Name: Eligible for Title XIX
Column Name: Total All Races
Year: 2011
Field Note:
These counts are from the unduplicated discharges with pregnancy and childbirth codes. Multiracial eligibles exceed that from the birth record, and is a reflection of how race-ethnicity is collected by the two different data sources (The Birth Record and Hospital Discharge).
- 4. Section Number:** Form8_I. Unduplicated Count By Race
Field Name: InfantsTotal_All
Row Name: Total Infants in State
Column Name: Total All Races
Year: 2011
Field Note:
Counts come from population estimates of children less than 1 year of age. For years 2001 and higher, population estimates data in 5-year groups are prepared by the U.S. Bureau of the Census. However, single-year estimates were prepared from Census data by the Division of Public Health, Office of Health Information for Planning.
- 5. Section Number:** Form8_I. Unduplicated Count By Race
Field Name: InfantsTitleV_All
Row Name: Title V Served
Column Name: Total All Races
Year: 2011
Field Note:
All births to residents of Georgia are included as receiving a Title V service because all receive newborn screening services, as required by statute (Ga. Code Ann. § 31-12-6 and 31-12-7). Total infants is a projection while births are event counts (which also do not take into account differences in immigration and emigration), and so there are times where births exceed infants in the state.
- 6. Section Number:** Form8_I. Unduplicated Count By Race
Field Name: InfantsTitleXIX_All
Row Name: Eligible for Title XIX
Column Name: Total All Races
Year: 2011
Field Note:
For the number of infants eligible for Medicaid, the proportion of deliveries eligible for Medicaid is applied to the total infants in state.
- 7. Section Number:** Form8_II. Unduplicated Count by Ethnicity

FORM 10
TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2011
[SEC. 506(A)(1)]
STATE: GA

1. State MCH Administration:
(max 2500 characters)

The Georgia Department of Community Health (DCH) is the state agency responsible for the administration of the Title V program. Within DCH, the Maternal and Child Health Program (MCHP) in the Division of Public Health is responsible for the administration of Title V funds and programs. The mission of the MCHP is to implement measurable and accountable services and programs that improve the health of women, infants, children, and their families throughout Georgia. The vision of the MCHP is to identify and deliver public health information, direct services, and population-based interventions that have an impact on the health status of women, infants, children, and their families throughout Georgia through the implementation of evidence-based strategies and the use of program and surveillance data. The MCHP administers the Newborn Metabolic and Genetic Screening Follow-up Program, the Universal Newborn Hearing Screening Initiative, the Georgia Family Planning Program under Titles X and XIX, the Health Check Program to support children accessing EPSDT services, the Children 1st Program that provides developmental assessments and links children to needed services, the Georgia Oral Health Program, the Children with Special Health Care Needs Services Program (Children's Medical Services), Georgia's Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), the MCH Epidemiology Program, and the Part C Early Intervention Program (Babies Can't Wait). The MCHP also has responsibility for the State System Development Initiative grant, the Pregnancy Risk Assessment and Monitoring System (PRAMS), and the Early Childhood Comprehensive Systems grant. There are three MCH-related programs located outside of the MCHP. The Georgia Immunization Program is administered by the Infectious Disease and Immunization Program. The Adolescent Health Program is administered by the Health Promotion and Disease Prevention Program. The Childhood Lead Screening Program is located in the Environmental Health Program. Data are made available to stakeholders throughout Georgia through an interactive, online data query system. The Online Analytical Statistical Information System (OASIS) is administered by the Office of Health Indicators for Planning in the Epidemiology Program. OASIS provides easy access to all major MCH data systems.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 16,284,772
3. Unobligated balance (Line 2, Form 2)	\$ 0
4. State Funds (Line 3, Form 2)	\$ 131,621,290
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 190,934,182
7. Program Income (Line 6, Form 2)	\$ 18,316,838
8. Total Federal-State Partnership (Line 8, Form 2)	\$ 357,157,082

9. Most significant providers receiving MCH funds:

Children's Medical Services (CSHCN)

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	73,134
b. Infants < 1 year old	150,804
c. Children 1 to 22 years old	372,849
d. CSHCN	35,049
e. Others	0

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

The Georgia MCH Program (MCHP) provides direct care and enabling services to many of Georgia's most vulnerable children through the Children's Medical Services (CMS), Children First (C1st), Babies Can't Wait (BCW), Babies Born Healthy (BBH), Family Planning Program, Health Check, Perinatal Hepatitis B Prevention, and the Oral Health Program. The mission of the CMS Program is to provide a comprehensive system of healthcare for children and youth with eligible chronic medical conditions from birth to twenty-one years of age. CMS is intended to ensure specialty healthcare services to these children of Georgia who live in low income households. These services are administered by CMS in a family-focused, coordinated, and culturally-caring approach. CMS works to provide improved health outcomes for the children with special healthcare needs by coordinating their access to affordable quality specialty healthcare in our communities and by using the resources in a responsible manner. C1st provides home visiting services to young children who are at risk for developmental delay and serves as a resource to link and refer children to needed services. BCW ensures that children ages birth to three years who have developmental delays or disabilities receive service coordination, evaluation, and assessment and early intervention services. BBH provides reimbursement for prenatal care for low income women not eligible for Medicaid. The Family Planning Program offers health education, health care, and direct family planning services to help women and men stay healthy and have healthy babies. These services strengthen families and communities throughout Georgia by promoting personal responsibility and economic self-sufficiency. Health Check is Georgia's well child or preventive healthcare program for Medicaid-eligible children birth to 21 years of age and PeachCare for Kids™-eligible children birth to 19 years of age. The Perinatal Hepatitis B Prevention Program identifies women who test positive for Hepatitis B and provides case management and follow-up. Services provided by the Oral Health Program include fluoride rinse, dental sealants, and other treatment services. With the Georgia WIC Program located within the MCHP, there are significant opportunities for coordination between WIC and other MCH programs that provide care for children ages five years and under and to ensure that WIC clients receive the maximum public benefits for which they are eligible.

b. Population-Based Services:
(max 2500 characters)

The MCH Program has several population-based initiatives delivered through the Nutrition Unit, Children 1st, the Newborn Screening Unit, the Oral Health program, and the Infectious Disease and Immunization Program. Through the activities of the Nutrition Unit, the MCH Program continues to implement population-based nutrition services through coordination with all other programs. Organizationally, the Georgia WIC Director also serves as the Chief State Nutritionist which promotes coordination between the messages received by the WIC and non-WIC populations. As part of the activities of the Nutrition Unit, partnerships have been developed to address health issues such as obesity, breastfeeding, and physical inactivity. For its cost savings benefits and benefits to mothers and infants, breastfeeding promotion and support will be a topic that will

receive considerable attention in Georgia. Through an algorithm applied to the electronic birth record, Children 1st screens every infant in Georgia for specific risk conditions that may increase the infant's risk for developmental delay. The Newborn Screening Unit maintains and supports a comprehensive, coordinated, statewide system to ensure that all newborns are screened for hearing loss prior to hospital discharge. District staff partner with the Newborn Screening Unit to provide follow-up for infants who are not screened or who do not pass their screen and are in need of follow-up services. All infants born in Georgia are screened for 20 metabolic/genetic disorders including cystic fibrosis. The Oral Health Program provides school-linked dental prevention programs targeting high-risk elementary school children. Though not in the MCH Program, the Infectious Disease and Immunization Program (IDI) provides screening for sexually transmitted diseases and human immunodeficiency virus. IDI also administers the statewide immunization program.

c. Infrastructure Building Services:
(max 2500 characters)

The MCH Program (MCHP) is committed to data analysis that can inform and guide action. Therefore, significant focus of Georgia's infrastructure building activities is on building the epidemiologic and surveillance activities. It is a core belief in the Georgia MCHP that improvements in public health can only be achieved through actions informed by data. To this end, the Georgia MCHP administers the Pregnancy Risk Assessment Monitoring System (PRAMS) which provides useful data to gain a better understanding of how specific risk factors impact health outcomes. The MCHP also conducts the Basic Screening Survey (BSS) to determine the proportion of third grade children who have dental sealants on at least one permanent molar. In addition to dental data, the BSS has been used to collect information on nutrition and body mass index. The Epidemiology Program administers the Behavioral Risk Factor Surveillance System (BRFSS) and Youth Risk Behavior Surveillance System (YRBSS). Planning has begun to sample PRAMS at the sub-state level to provide district-level point estimates, new questions are being considered for BRFSS, and plans have begun to develop a BRFSS breastfeeding module that could be made available to other states and implemented in Georgia. The MCHP is also exploring the need for a child health survey much like the National Survey of Children's Health, though more frequently, a women's health survey, and an infant feeding practices survey to be implemented in WIC. To improve the use of existing administrative and survey data, the Division of Public Health operates the Online Analytical Statistical Information System (OASIS). OASIS provides easy, online access to the most recent natality, morbidity, and mortality data by providing access to vital records, inpatient and emergency room hospital discharge data; population data and projections; and BRFSS and YRBSS data. The MCHP includes an MCH Epidemiology Section. The MCH Epidemiology Section is led by a Section Director and includes nine full time epidemiologists. The purpose of the MCH Epidemiology Section is to manage data for grant requirements, maintain and expand surveillance systems, identify and address data gaps, provide data to programs to inform strategic planning and decision making, and contribute to the MCH knowledge base through original research, presentations, and peer reviewed publications.

12. The primary Title V Program contact person:

Name	Brian C. Castrucci
Title	Program Director
Address	2 Peachtree Street
City	Atlanta

Field Level Notes**1. Section Number:** Form11_Performance Measure #2**Field Name:** PM02**Row Name:****Column Name:****Year:** 2009**Field Note:**

Data used to populate this measure were from the 2005/2006 National Survey of Children with Special Health Care Needs. The annual indicator will reflect the data from this survey until a new data source or an updated survey is available.

Numerator and denominator estimates were made. These estimates are important to demonstrate that while the percent remains constant the number of affected children increased as the population grows. Numerator data were estimated by multiplying the percent by the denominator. The denominator is estimated by multiplying the CSHCN prevalence (13.9%) by the total number of children ages birth to 17 years. The total number of children ages birth to 17 years is from population projections provided by OASIS. Population projections were not available for 2009. The population estimate for 2009 was estimated using a linear projection with data from 2000 through 2008.

Sufficient data are not available to use a projection to forecast the annual performance objective between 2010 through 2014. An anticipated 2% increase will be applied to the annual performance objective in 2009.

2. Section Number: Form11_Performance Measure #2**Field Name:** PM02**Row Name:****Column Name:****Year:** 2008**Field Note:**

Data is from the 2005-2006 SLAITS survey. Data for CY 2008 will not be available until the 2007-2008 survey is conducted and results are posted.

3. Section Number: Form11_Performance Measure #2**Field Name:** PM02**Row Name:****Column Name:****Year:** 2007**Field Note:**

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. The same questions were used to generate the NPM02 indicator for both the 2001 and the 2005-2006 CSHCN survey.

PERFORMANCE MEASURE # 03

The percent of children with special health care needs age 0 to 18 who receive coordinated, ongoing, comprehensive care within a medical home. (CSHCN Survey)

Data reflect the 4:3:1:3:3:1 immunization series. Data retrieved from <http://www.cdc.gov/vaccines/stats-surv/imz-coverage.htm#nis> on May 13, 2010. Numerator and denominator are estimates based on the percentage reported by the National Immunization Survey. Data are unavailable for 2009. The 2009 estimate is developed using a linear projection with data from 2000 through 2008. The number of children 19 to 35 months is estimated by taking the number of children age 1 year dividing by 12 and multiplying by 5 plus all children age 2 years. Population estimates are provided by the Georgia Online Analytical Statistical Information System.

To ensure data integrity across previous years, data were updated for 2007, 2008, and 2009.

The average annual percent change for this indicator is approximately zero (-0.02%). The annual performance objective estimates reflect Georgia's goal of building on the projected increase in FY09 and making progress toward achieving rates previously reported in 2006.

PERFORMANCE MEASURE # 08

The rate of birth (per 1,000) for teenagers aged 15 through 17 years.

Annual Indicator					
Numerator					
Denominator					

Field Level Notes**1. Section Number:** Form11_Performance Measure #9**Field Name:** PM09**Row Name:****Column Name:****Year:** 2009**Field Note:**

The percent of third grade children who have received a protective sealant on at least one permanent molar tooth is determined from the Basic Screening Survey. The Basic Screening Survey is a sample survey that includes an oral examination performed by a trained professional. The most recent Basic Screening Survey was for the 2005/2006 school year. This percent will be reported with updated numerator and denominator data based on the actual number of students enrolled in third grade. In the 2010/2011 school year, a new Basic Screening Survey is planned, which will provide updated data for this measure.

Denominator data from 2005-2006 K-12 Public Schools Annual Report Card (<http://reportcard2006.gaosa.org/k12/demographics.aspx?ID=ALL:ALL&TestKey=EnR&TestType=demographics>). All data reflect Fall enrollment except for 2006 which reflects Spring enrollment. Data for 2007, 2008, and 2009 are estimated with a linear projection methodology using data from 2003 through 2006.

Data were updated for 2007, 2008, and 2009.

As this indicator is populated using data from the 2005/2006 Basic Screening Survey until a new survey is completed, estimating the annual performance objective is difficult. Based on the data from the 2005/2006 survey (39% with sealants), a 0.5% increase would be expected annually from 2006 through 2014.

PERFORMANCE MEASURE # 10

The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 children.

	<u>Annual Objective and Performance Data</u>				
	2005	2006	2007	2008	2009

Field Level Notes

- Section Number:** Form11_Performance Measure #11

Field Name: PM11

Row Name:

Column Name:

Year: 2009

Field Note:

The specific source for these data are http://www.cdc.gov/breastfeeding/data/nis_data accessed on May 14, 2010. Data are based on birth cohorts. As such, the measure of six month breastfeeding in the National Immunization Survey reports on activity in 2006 and 2007. Therefore, the data reported for the 2007 reporting year are from the 2006 birth cohort. Data from the 2007 and 2008 birth cohorts are not available. For the 2008 and 2009 reporting year, data were estimated using a linear projection with data from the 2000 through 2006 birth cohorts. While NIS is a sample survey, the numerator is estimated by multiplying the number of births reported for the specific birth cohort.

Data were updated for 2008 and 2009.

Annual performance objective estimates are developed by applying the average annual percent change (3.6%) between 2000 through 2009 to the 2009 point estimate.

Annual Performance Objective	99.5	99.5	99.5	99.9	99.9
Annual Indicator					
Numerator					
Denominator					

Field Level Notes1. **Section Number:** Form11_Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2009**Field Note:**

The denominator is the number of eligible births reported by the hospital, which equals live births minus newborn deaths, minus refused screening, minus transferred out without screen, plus transferred in without screen. The numerator is the number of births screened. It is common that hospitals report that they screen more births than are eligible and then have a report of screening over 100% of their births. The data reported adjusts for over reporting screening by not allowing any hospital to go over 100%.

The annual performance objectives reflect Georgia's goal and belief that 100% of all newborns should receive a hearing screen prior to hospital discharge.

PERFORMANCE MEASURE # 13

Percent of children without health insurance.

Field Name: PM15

Row Name:

Column Name:

Year: 2009

Field Note:

PRAMS data are not available for 2007, 2008, or 2009. These data have been estimated using a linear projection with PRAMS data from 2004 through 2006. While PRAMS is a sample survey, the numerator is estimated by multiplying the rate from PRAMS and the total number of pregnancies in the year. Pregnancy data are available through 2007. Pregnancies for 2008 and 2009 are estimated using a linear projection.

There are insufficient data to project the annual performance objectives based on previous data. The annual performance objectives were estimated using an annual decline of 2.5%.

PERFORMANCE MEASURE # 16

The rate (per 100,000) of suicide deaths among youths aged 15 through 19.

Annual Objective and Performance Data

	2005	2006	2007	2008	2009

Annual Performance Objective	70	70.4	70.8	71.1	71.5
Annual Indicator					
Numerator					
Denominator					

Field Level Notes**1. Section Number:** Form11_Performance Measure #18

Field Name: PM18

Row Name:

Column Name:

Year: 2009

Field Note:

In 2007, Georgia adopted the 2003 Revised Birth Certificate part way through the year. This had two impacts on NPM18. First, it changed how the entry into prenatal care question was asked from asking for month of entry into prenatal care to asking for date of entry into prenatal care. Second, the vitals reporting system changed. The impact of the first change is well described by National Center for Health Statistics. The impact of the second change was that the percent of women with unknown entry into prenatal care increased beyond what would be expected to happen from the wording change alone. In 2007, 22.5% of women were missing information necessary for calculating trimester of entry into prenatal care. The denominator is all births. If the denominator was limited to only those who had valid data, the rate in 2007 (the last year for which actual data exist) would be 82.7% (96,662/116,941).

Data from 2007, 2008, and 2009 were updated.

Data are unavailable for 2008 and 2009. The provisional estimates are developed using a linear projection with data from 2000 through 2007. Given the changes in this measure, the linear projections may be less reliable than in other measures.

Given the current volatility of this measure, projecting the annual performance measure is challenging. Based on the projected rate in 2009, the annual performance measure reflects a 0.5% increase in this measure annually.

Field Level Notes**1. Section Number:** Form11_State Performance Measure #5**Field Name:** SM5**Row Name:****Column Name:****Year:** 2009**Field Note:**

BRFSS is the data source for this measure. Women of reproductive age is defined as 18-44 years. The question used for this measure was asked only in 2000, 2002, and 2006, and is the percent of women who reported taking either a multivitamin or another pill or supplement containing folic acid. The amount of folic acid contained in the pills or supplement was not collected.

The 2006 point estimate was reported in 2007, 2008, and 2009 and applied to 2007, 2008, and 2009 population to calculate the denominator. The 2009 population estimate was developed with a linear projection with data from 2000 through 2008.

This measure will be retired.

2. Section Number: Form11_State Performance Measure #5**Field Name:** SM5**Row Name:****Column Name:****Year:** 2008**Field Note:**

2006 is the most recent year that Georgia included the folic acid module in BRFSS.

Field Level Notes**1. Section Number:** Form11_State Performance Measure #10**Field Name:** SM10**Row Name:****Column Name:****Year:** 2009**Field Note:**

These data are taken from the Georgia Early Childhood Comprehensive Systems (ECCS) grant, Performance Measure #30. In 2009, the Performance Measure scoring was changed from a total possible score of 35 to a total possible score of 24. The form requests a self-assessment on the following 8 criteria:

1. State Plan supported the capacity of pediatric care providers to better identify, treat, and refer children with developmental risks and delays.
2. State Plan provided for the education of front line providers – teachers, health care workers, school counselors and coaches, faith-based workers, and clinicians of all disciplines – to recognize mental health issues in mothers of infants and young children and for the identification of and wide dissemination of quality measurement and improvement tools that can be used by health and early childhood development professionals to assess and strengthen the social-emotional development of young children.
3. State Plan provides for collaboration between the State Maternal and Child Health program and Child Care office addressing the sustainability of their Healthy Child Care America 2000 Program.
4. State Plan addresses strengthening the quality of child care by widely disseminating and providing technical consultation support for the adoption of child care health and safety standards from the 2nd edition of Caring for Our Children.
5. State Plan provides for the development of affordable, high quality parenting education programs that prepare parents to promote optimal physical, social-emotional, and cognitive development in their children.
6. State Plan provides for the development of family support services that address the stressors impairing the ability of families to nurture and support the healthy development of their children.
7. State Plan provides for the refinement of current home visiting programs in keeping with the science-based findings from recent home visiting program evaluations.
8. State Plan provides for the support and encouragement of greater involvement of home visiting resources in the context of one-stop-shopping family resource centers.

This measure will be retired.

Field Level Notes

1. **Section Number:** Form12_State Outcome Measure 1

Field Name: SO1

Row Name:

Column Name:

Year: 2009

Field Note:

Data are unavailable for 2008 and 2009. The provisional estimates are developed using a linear projection with data from 2000 through 2007. Population data provided by the Georgia Online Analytic Statistical Information System. Population data for 2009 are estimated using a linear projection with data from 2000 through 2008.

Data were updated for 2007, 2008, and 2009.

Georgia inpatient discharge data, 2000-2008. ICD-9 250.x with noted exclusions below that specify type 2 diabetes. Excludes ICD-9 codes 250.01, .03, .11, .13, .21, .23, .31, .33, .41, .43, .51, .53, .61, .63, .71, .73, .81, .83, .91, .93. Even with exclusions, ICD-9 250 codes remains a heterogeneous mix of diabetes types.

FORM 13
CHARACTERISTICS DOCUMENTING FAMILY PARTICIPATION IN CSHCN PROGRAMS
STATE: GA

1. Family members participate on advisory committee or task forces and are offering training, mentoring, and reimbursement, when appropriate.

1

2. Financial support (financial grants, technical assistance, travel, and child care) is offered for parent activities or parent groups.

1

3. Family members are involved in the Children with Special Health Care Needs elements of the MCH Block Grant Application process.

2

4. Family members are involved in service training of CSHCN staff and providers.

1

5. Family members hired as paid staff or consultants to the State CSHCN program (a family member is hired for his or her expertise as a family member).

1

6. Family members of diverse cultures are involved in all of the above activities.

1

Total Score: 7

Rating Key

0 = Not Met

1 = Partially Met

2 = Mostly Met

3 = Completely Met

FORM NOTES FOR FORM 13

Families of children with special healthcare needs, Parent to Parent of Georgia, and the Georgia AMCHP Family Representative all contributed to the assessment of family participation in CSHCN programs (Form 13). Information used to complete this form included:

- A self-assessment completed by each public health district. Self-assessments in three of the 18 public health districts (1-1, 3-1, and 5-1) were greater than those in the other 15 public health districts.
- Data were gathered from a meeting with family members of children with special health care needs.
- A standard tool was distributed to family leaders in the Children Medical Services programs in each public health district by leadership in Georgia Parent to Parent.
- Georgia Parent to Parent conducted key informant interviews with selected Children's Medical Services District Program Coordinators to determine how families were involved in their programs and the degree of support families received.

In previous submissions of the Title V MCH Services Block Grant application, families were not involved in the preparation of Form 13. This has noted in past federal reviews as an area for improvement. With expanded family involvement in the completion of Form 13, Georgia's score has declined between the FY10 and FY11 applications from 18 to 7, respectively. This decline reflects the change in the process of completing Form 13 rather than an actual decline in family involvement.

FIELD LEVEL NOTES

1. **Section Number:** Form13_Main

Field Name: Question3

Row Name: #3. Family members are involved in the Children with Special Health Care Needs...

Column Name:

Year: 2011

Field Note:

Family respondents indicated that Title V met 10 of 12 objectives used to measure this objective. Objectives are listed below.

Public hearings to develop application (Not Met)

Public hearings to review application/provide feedback (Not Met)

Focus groups for families to develop application (Met)

Focus groups for families to review completed application (Met)

One or more family members invited to develop application (Met)

One or more family members invited to review completed application/provide feedback (Met)

One or more family organizations invited to develop application (Met)

One or more family organizations invited to review completed application/provide feedback (Met)

Family members and/or organizations invited to develop needs assessment (Met)

Family members surveyed to gather information for needs assessment (Met)

Family organizations surveyed to gather information for needs assessment (Met)

Family members and/or organizations invited to provide input to Needs Assessment Summary in Block Grant Application (Met)

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: GA FY: 2011

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Decrease infant mortality and injury.
2. Reduce motor vehicle crash mortality among children ages 15 to 17 years.
3. Decrease obesity among children and adolescents.
4. Reduce repeat adolescent pregnancy.
5. Increase developmental screening for children in need.
6. Improve the maternal and child health surveillance and evaluation infrastructure.
7. Improve childhood nutrition.
8. Increase awareness of the need for preconception healthcare among women of childbearing age.
9. Increase the percent of qualified medical providers who accept Medicaid and who serve children with special healthcare needs.
- 10.

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: GA

SP(Reporting Year) # 1

PERFORMANCE MEASURE:

Percentage of very low birth weight babies enrolled in High Risk Infant Follow-Up (HRIFU)

STATUS:

Active

GOAL

To assure improved outcomes for very low birth weight babies through increased enrollment in HRIFU.

DEFINITION

Percent of infants born weighing less than 1,500 grams.

Numerator:

Number of infants born weighing less than 1,500 grams in a given year.

Denominator:

Number of births in a given year.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

OASIS Data on births. HRIFU Program Data for enrollees.

SIGNIFICANCE

Preventive care for very low birth weight newborns for the first year to assure better health outcomes and lessen the incidence of emergency room visits.

SP(Reporting Year) # 2

PERFORMANCE MEASURE:

Percentage of high school students who participated in physical activity for at least 20 minutes on 3 or more of the past 7 days

STATUS:

Active

GOAL

To reduce obesity in the Georgia population by increasing physical activity in youth.

DEFINITION

Numerator:

High school students surveyed who report participating in physical activity for at least 20 minutes on 3 or more of the past 7 days.

Denominator:

Total number of high school students surveyed.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 22-7

Increase the proportion of adolescents who engage in vigorous physical activity that promotes cardiorespiratory fitness 3 or more days per week for 20 or more minutes per occassion.

DATA SOURCES AND DATA ISSUES

The Georgia School Health Survey (YRBS).

SIGNIFICANCE

Obesity is an increasing problem in Georgia and a major cause for morbidity and mortality. Increasing physical activity is one of Georgia's four key strategies for reducing obesity.

SP(Reporting Year) # 3

PERFORMANCE MEASURE:

Rate of hospitalizations due to unintentional injuries among children ages one through age four.

STATUS:

Active

GOAL

To reduce morbidity due to injuries among young children.

DEFINITION

Rate of hospitalizations due to unintentional injuries among children ages from one year through four years of age per 100,000 population.

Numerator:

Number of unintentional injury related hospitalizations among children ages one year through four years of age.

Denominator:

Total number of children ages one year through four years of age.

Units: 100000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 15-14 (Developmental)
Reduce nonfatal unintentional injuries.

DATA SOURCES AND DATA ISSUES

Georgia Hospital Discharge Data Set and Census Population Estimates

SIGNIFICANCE

Unintentional injuries are the leading cause of death and a major cause of morbidity among young children and all MCH populations.

SP(Reporting Year) # 4

PERFORMANCE MEASURE:

Percent of Medicaid and PeachCare (S-CHIP) enrolled children who received preventive oral health services.

STATUS:

Active

GOAL

To improve oral health among children in Georgia.

DEFINITION

Numerator:

The number of children enrolled in Medicaid (less than 21 years of age) or Peachcare (less than 19 years of age) who receive a preventive dental service.

Denominator:

The total number of children enrolled in Medicaid (less than 21 years of age) or Peachcare (less than 19 years of age).

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 21-12

Increase the proportion of low-income children and adolescents who received any preventive dental service during the past year.

DATA SOURCES AND DATA ISSUES

Medicaid and Peachcare (S-CHIP) billing data.

SIGNIFICANCE

Access to preventive dental health services is a significant factor in overall oral health. Even with dental coverage through Medicaid and Peachcare, low-income children are less likely than their higher income counterparts to receive preventive dental health services.

SP(Reporting Year) # <u>5</u>	
PERFORMANCE MEASURE:	Percent of women of reproductive age who consume at least 400mcg of folic acid daily
STATUS:	Active
GOAL	Reduce the occurrence of spina bifida and other neural tube defects in Georgia.
DEFINITION	<p>Percent of women of reproductive age (18-44) who report that they take a supplement containing at least 400mcg of folic acid daily.</p> <p>Numerator: Number of women ages 18-44 surveyed who report taking a multivitamin or other supplement with 400mcg of folic acid daily.</p> <p>Denominator: Total number of women ages 18-44 surveyed.</p> <p>Units: 100 Text: 1</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>Objective 16-16 Increase the proportion of pregnancies begun with an optimum folic acid level</p> <p>Objective 16-15 Reduce the occurrence of spina bifida and other neural tube defects.</p>
DATA SOURCES AND DATA ISSUES	Behavioral Risk Factor Surveillance System (BRFSS). The folic acid optional module will only be included in the GA BRFSS every other year or every third year.
SIGNIFICANCE	Approximately 50% of pregnancies affected with NTDs may be prevented with adequate consumption of folic acid from 1 month before conception through the first 3 months of pregnancy.

SP(Reporting Year) # 6

PERFORMANCE MEASURE:

Percent of repeat births among adolescents aged 15-17-years-old

STATUS:

Active

GOAL

To reduce repeat births among Georgia's adolescents aged 15-17-years-old.

DEFINITION

Percent of repeat births to adolescents aged 15 to 17 years old out of total births to 15-17 year olds.

Numerator:

Number of repeat births to females ages 15 to 17.

Denominator:

Total number of births to females ages 15 to 17.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 9-7

Reduce pregnancies among adolescent females.

DATA SOURCES AND DATA ISSUES

Georgia Vital Statistics.

SIGNIFICANCE

The teenage pregnancy rate in Georgia is among the highest in the country. Most teen pregnancies are not planned and occur outside marriage. Especially among younger teens, teen pregnancy is considered a public health and societal problem. One of the focus areas for Georgia pregnancy prevention programs is to reduce the rate of repeat births among adolescents.

SP(Reporting Year) # 7

PERFORMANCE MEASURE:

Rate of SIDS among African American infants.

STATUS:

Active

GOAL

To reduce the racial disparity in Georgia due to infant mortality and SIDS.

DEFINITION

SIDS refers to the sudden death of a child under 1 year of age that remains unexplained even after a thorough case investigation.

Numerator:

The number of infant deaths among African Americans due to SIDS.

Denominator:

The total number of live births among African Americans.

Units: 1000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 16-1h

Reduce deaths from sudden infant death syndrome (SIDS).

DATA SOURCES AND DATA ISSUES

Georgia vital statistics.

SIGNIFICANCE

SIDS is the leading cause of death during the postneonatal period (29 to 365 days). African American infants are twice as likely to die of SIDS in Georgia as white infants.

SP(Reporting Year) # <u>8</u>	
PERFORMANCE MEASURE:	Percentage of Medicaid children who have had a developmental screening
STATUS:	Active
GOAL	To improve early detection of delays in children and improve child health and well-being for identified children.
DEFINITION	Measure under development. Numerator: Denominator: Units: 100 Text: Percent
HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	To be determined
SIGNIFICANCE	Many children with behavioral or developmental disabilities are missing vital opportunities for early detection and intervention. The American Academy of Pediatrics (AAP) and the American Academy of Neurology recommend that all infants and young children be screened for developmental delays periodically in the context of office-based primary care.

PERFORMANCE MEASURE:

The percent of MCH state and local public health staff that have completed the Public Health 101 course.

STATUS:

Active

GOAL

To ensure that MCH County and District staff understand the core functions of Public Health.

DEFINITION

The number of Division of Public Health staff that have completed the Public Health 101 course out of the total number of Public Health staff.

Numerator:

Number of Public Health staff that have completed the Public Health 101 course.

Denominator:

Total number of Public Health staff.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 23-11

Increase the proportion of State and local public health agencies that meet national performance standards for essential public health services.

Objective 23-8

Increase the proportion of Federal, Tribal, State, and local agencies that incorporate specific competencies in the essential public health services into personnel systems.

DATA SOURCES AND DATA ISSUES

Data from the Office of Training and Workforce Development.

SIGNIFICANCE

As public health professionals face new challenges in the 21st century, it is imperative to ensure a prepared public health workforce that functions at an advanced level of competence. By taking action to train the workforce in the critical skills of public health and pursuing our goals, we can enhance Georgia's public health infrastructure and ability to respond to new challenges

PERFORMANCE MEASURE:

The extent to which partnerships that support Early Childhood Comprehensive Systems (ECCS) are effective.

STATUS:

Active

GOAL

To ensure effective collaborations and partnerships that support families and communities to assure that their children are healthy and ready to learn when they start school.

DEFINITION

The extent to which the partnerships that support the ECCS initiative based on seven key areas of evaluation of partnerships. (Rating Sheet Attached).

Numerator:

The total combined score of the seven five-point Likert scale questions.

Denominator:

The total combined points possible of the seven five-point Likert scale questions.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

16-23

Increase the proportion of Territories and States that have service systems for children with special health care needs.

DATA SOURCES AND DATA ISSUES

A scoring sheet based on a qualitative assessment by key stakeholders of the ECCS initiative using seven five-point Likert scale questions.

SIGNIFICANCE

The improvement of MCH outcomes requires a system-oriented partnership-based approach that incorporates infrastructure, population-based services, enabling services, and direct services. Traditionally, local health departments provided clinical services dependent on categorical funding. As a broader responsibility for casting public health around the three core functions (policy development, assessment, and assurance) has emerged, the role partnerships and collaboration in the design and implementation of a total cohort service delivery system has become critical. An effective collaborative plan needs to engage a broad array of stakeholders, community partners, and consumers.

SO(Reporting Year) # 1

OUTCOME MEASURE:

Rate of Type 2 diabetes hospitalizations among children ages one through 19.

STATUS:

Active

GOAL

To reduce Type 2 diabetes related morbidity among children in Georgia.

DEFINITION

To address primary prevention of type 2 diabetes in youth and secondary prevention that leads to the need for hospitalization.

Numerator:

of hospitalizations for type 2 diabetes among children ages one to 19.

Denominator:

of children ages 1-19

Units: 100000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 5-2
Prevent diabetes.
Objective 19-3
Reduce the proportion of children and adolescents who are overweight or obese.

DATA SOURCES AND DATA ISSUES

Medicaid data.

SIGNIFICANCE

Type 2 Diabetes is an increasing problem among youth in Georgia. Monitoring of hospitalizations is important to monitor this trend and to address primary prevention of type 2 diabetes in youth and secondary prevention that leads to the need for hospitalization.

FORM 17
HEALTH SYSTEMS CAPACITY INDICATORS
FORMS FOR HSCI 01 THROUGH 04, 07 & 08 - MULTI-YEAR DATA
STATE: GA

Form Level Notes for Form 17

None

HEALTH SYSTEMS CAPACITY MEASURE # 01

The rate of children hospitalized for asthma (ICD-9 Codes: 493.0 -493.9) per 10,000 children less than five years of age.

	<u>Annual Indicator Data</u>				
	2005	2006	2007	2008	2009
Annual Indicator	32.3	32.3	20.6	22.7	21.1
Numerator	2,236	2,236	1,522	1,684	1,610
Denominator	692,726	692,726	737,422	740,521	763,751

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer
 than 5 and therefore a 3-year moving average cannot be
 applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Provisional

Provisional

Field Level Notes

1. **Section Number:** Form17_Health Systems Capacity Indicator #04

Field Name: HSC04

Row Name:

Column Name:

Year: 2009

Field Note:

In 2007, Georgia adopted the 2003 Revised Birth Certificate part way through the year. This had two impacts on HSCI 04. First, it changed how the entry into prenatal care question was asked from asking for month of entry into prenatal care to asking for date of entry into prenatal care. Second, the vitals reporting system changed. The impact of the first change is well described by NCHS. The impact of the second change was that the percent of women with unknown entry into prenatal care increased beyond what would be expected to happen from the wording change alone. In 2007, 25.8% of women were missing information necessary for calculating the Kotelchuck Index.

The reported percentages use total births to women 15 to 44 years of age. If limited to only those births for which there are valid data, the reported percent would be 68.2% compared to 49.8%.

Data are unavailable for 2008 and 2009. The provisional estimates are developed using a linear projection with data from 2000 through 2007.

Data were updated for 2007, 2008, and 2009.

HEALTH SYSTEMS CAPACITY MEASURE # 07A

Percent of potentially Medicaid-eligible children who have received a service paid by the Medicaid Program.

	2005	2006	Annual Indicator Data		
			2007	2008	2009
Annual Indicator	<u>81.1</u>	<u>80.8</u>	<u>40.5</u>	<u>45.2</u>	<u>43.2</u>
Numerator	<u>875,228</u>	<u>846,040</u>	<u>432,843</u>	<u>479,182</u>	<u>494,864</u>
Denominator	<u>1,078,849</u>	<u>1,046,926</u>	<u>1,069,682</u>	<u>1,059,612</u>	<u>1,146,385</u>

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Field Level Notes

1. **Section Number:** Form17_Health Systems Capacity Indicator #08

Field Name: HSC08

Row Name:

Column Name:

Year: 2009

Field Note:

The source for the denominator was SSI Recipients by State and County, 2009, 2008, and 2007 (http://www.ssa.gov/policy/docs/statcomps/ssi_sc/). This source provides SSI recipients less than 18 years of age. The number of recipients less than 16 years of age was estimated by applying the proportion of children 16 years of age and younger in the Georgia population to the number of recipients less than 18 years of age. Population data are available for 2007 and 2008. 2008 population data were used for the 2009 estimate. For 2007 and 2008, the percent of children 16 years of age or younger among all children younger than 18 years of age was 94.6%.

The source for the numerator is Children's Medical Services program data.

Data were updated for 2007, 2008, and 2009.

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #05

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: GA

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	2	No
Annual linkage of birth certificates and WIC eligibility files	2	No
Annual linkage of birth certificates and newborn screening files	3	Yes
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	3	Yes
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:
1 = No, the MCH agency does not have this ability.
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: GA

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Other:		

*Where:
1 = No
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:
1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 19

None

FIELD LEVEL NOTES

1. **Section Number:** Form19_Indicator 09A

Field Name: BAW

Row Name: Annual linkage of birth certificates and WIC eligibility files

Column Name:

Year: 2011

Field Note:

WIC data have not previously been linked to birth certificate files. However, the capacity exists to conduct this linkage. With WIC administratively located in the MCH Program, it is hoped that these data sets can be linked in the future. When linked, the MCH Program will have direct access to the database.

2. **Section Number:** Form19_Indicator 09A

Field Name: BAN

Row Name: Annual linkage of birth certificates and newborn screening files

Column Name:

Year: 2011

Field Note:

Raw birth data are automatically linked to the newborn screening data.

3. **Section Number:** Form19_Indicator 09A

Field Name: BirthDefects

Row Name: Annual birth defects surveillance system

Column Name:

Year: 2011

Field Note:

Georgia is developing a passive birth defects surveillance system. This system would rely on data linkages and developed algorithms. There is an active surveillance system, but it is incomplete in its coverage of Georgia.

4. **Section Number:** Form19_Indicator 09A

Field Name: BAM

Row Name: Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files

Column Name:

Year: 2011

Field Note:

Medicaid files and birth files have not been linked in Georgia since 2004. Through an improved relationship with Medicaid, it is hoped that these two data sets will be linked more routinely in the future. When linked, MCH Program has direct access to the electronic database.

FORM 20
HEALTH STATUS INDICATORS #01-#05
MULTI-YEAR DATA
STATE: GA

Form Level Notes for Form 20

None

HEALTH STATUS INDICATOR MEASURE # 01A

The percent of live births weighing less than 2,500 grams.

1. **Section Number:** Form20_Health Status Indicator #03B

Field Name: HSI03B

Row Name:

Column Name:

Year: 2009

Field Note:

Georgia Final Death File, 2000-2007, accessed through OASIS. ICD-10 codes V02-V04, V09.0, V09.2, V12-V14, V19.0-V19.2, V19.4-V19.6, V20-V79, V80.3-V80.5, V81.0-V81.1, V82.0-V82.1, V83-V86, V87.0-V87.8, V88.0-V88.8, V89.0, and V89.2 .

Consists of all accidents in which any motorized vehicle (car, truck, motorcycle, etc.) was involved, including ones involving motor vehicles injuring pedestrians or bicyclists.

Data are unavailable for 2008 and 2009. The provisional estimates are developed using a linear projection with data from 2000 through 2007. Population data provided by the Georgia Online Analytic Statistical Information System. Population data for 2009 are estimated using a linear projection with data from 2000 through 2008.

Data were updated for 2007, 2008, and 2009.

HEALTH STATUS INDICATOR MEASURE # 03C

The death rate per 100,000 from unintentional injuries due to motor vehicle crashes among youth aged 15 through 24 years.

	Annual Indicator Data				
	2005	2006	2007	2008	2009
Annual Indicator	<u>27.0</u>	<u>27.0</u>	<u>31.7</u>	<u>30.9</u>	<u>30.9</u>
Numerator	<u>355</u>	<u>355</u>	<u>421</u>	<u>414</u>	<u>426</u>
Denominator	<u>1,313,523</u>	<u>1,313,523</u>	<u>1,326,310</u>	<u>1,340,902</u>	<u>1,377,079</u>

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Is the Data Provisional or Final?

FORM NOTES FOR FORM 21

#06A

Source #06A and #06B: Georgia population data, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryPopulation.aspx>

Population data for years 1994-1999 are the National Center for Health Statistics Bridged-race estimates. These estimates replaced the Census' post-censal estimates on 1.12.04. However, single-year estimates were prepared from the actual Census count, prepared by the U.S. Bureau of the Census. Documentation and file layouts are available from the U.S. Bureau of the Census web site. Census populations include military, students, and institutionalized persons if in their usual and customary residence. For years 2001 and higher, population estimates data in 5-year groups are also prepared by the U.S. Bureau of the Census. However, single-year estimates were prepared from Census data by the Division of Public Health. Race per the Federal Office of Management and Budget, Directive 15 (1997): White is a person having origins in any of the original peoples of Europe, the Middle East or North Africa; Black or African-American is a person having origins in any of the Black racial groups of Africa; Asian is a person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand and Vietnam; American Indian/Alaska Native is a person having origins in any of the original peoples of North and South America (including Central American), and who maintains tribal affiliation or community attachment; Native Hawaiian or Other Pacific Islander is a person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands; Multiracial is a person declaring 2 or more of these races.

#06B

Hispanic or Latino includes persons of Mexican, Puerto Rican, Cuban, South or Central American, or other Spanish culture or origin, regardless of race.

#07A

Source: Georgia final birth file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMCH.aspx>

When race is missing in less than 5% of birth records, race is imputed using procedures developed by the Office of Health Information for Planning (OHIP). Imputation is based on multiple factors, including geography and individual characteristics.

#08A and #08B

Source: Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>

#10

Source: Georgia population data, projected by the Office of Health Information for Planning.

See note for Population on #6A and B.

#11

Source: Data from Table C17002, 2008 American Community Survey.

#12

Data from Table B17024, 2008 American Community Survey. Table provides counts for <18 and then 18-24. To include 18-19 year olds, the total for 18-24 was divided by 6, and then multiplied by 2.

FIELD LEVEL NOTES

- Section Number:** Form21_Indicator 09A
Field Name: HSIRace_Children
Row Name: All children 0 through 19
Column Name:
Year: 2011
Field Note:
Georgia population data, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryPopulation.aspx>. See Note for HSI 6-7.
- Section Number:** Form21_Indicator 09A
Field Name: HSIRace_SingleParentPercent
Row Name: Percent in household headed by single parent
Column Name:
Year: 2011
Field Note:
Data from Table S0901, 2008 American Community Survey.
- Section Number:** Form21_Indicator 09A
Field Name: HSIRace_TANFPercent
Row Name: Percent in TANF (Grant) families
Column Name:
Year: 2011
Field Note:
From Table 35. <http://www.acf.hhs.gov/programs/ofa/character/FY2008/tab35.htm>. The percentage for Other/Unknown is zero because while the numerator data source includes Other/Unknown, the denominator data source is 0. Race and ethnicity are reported under one measure in this data system.
- Section Number:** Form21_Indicator 09A
Field Name: HSIRace_MedicaidNo
Row Name: Number enrolled in Medicaid
Column Name:
Year: 2011
Field Note:
Georgia Medicaid program data. Race and ethnicity are reported under one measure in the data system. Hispanic enrollees (44,728 in CHIP and 5,012 in Medicaid) are included in the total but not in the race breakdown.
- Section Number:** Form21_Indicator 09A
Field Name: HSIRace_SCHIPNo
Row Name: Number enrolled in SCHIP
Column Name:
Year: 2011
Field Note:
Georgia Medicaid program data. Race and ethnicity are reported under one measure in the data system. Hispanic enrollees (44,728 in CHIP and 5,012 in Medicaid) are

included in the total but not in the race breakdown.

6. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_FoodStampNo
Row Name: Number enrolled in food stamp program
Column Name:
Year: 2011
Field Note:
Using Race and Age Tables from <http://www.dfcsdata.dhr.state.ga.us/menusearch06.asp>, the total participants in the food stamp program were calculated. To get the number 18-19 the count of 18-21 was divided by two and added to those <18. Race distributions for participants in the food stamp program were then applied to this count to get race specific counts.
7. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_WICNo
Row Name: Number enrolled in WIC
Column Name:
Year: 2011
Field Note:
Georgia WIC program data. Includes infants and children 0-5 and prenatal, breastfeeding, and non-breastfeeding women 11-19 served by WIC.
8. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_JuvenileCrimeRate
Row Name: Rate (per 100,000) of juvenile crime arrests
Column Name:
Year: 2011
Field Note:
Georgia Department of Juvenile Justice (DJJ) data: Number of intake admissions. Data accessed at <http://www.djj.state.ga.us/Statistics/rptstatDescriptive.asp?type=State>. The percentage for Other/Unknown is zero because while the numerator data source includes Other/Unknown, the denominator data source is zero. American Indian/Native Alaskan, Asian, Native Hawaiian/Other Pacific Islander, and Multiracial are zero because these are not reported by DJJ. Race and ethnicity were reported under one measure in this data system. Counts are limited to those <18.
9. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_DropOutPercent
Row Name: Percentage of high school drop-outs (grade 9 through 12)
Column Name:
Year: 2011
Field Note:
Data from the Georgia Department of Education (school year), and accessed at www.gadoe.org/ReportingFW.aspx?PageReq=1023&StatId=ALL&T=1. Race and ethnicity are reported under one measure in this data system.
10. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_Children
Row Name: All children 0 through 19
Column Name:
Year: 2011
Field Note:
Georgia population data, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryPopulation.aspx>. See Note for HSI 6-7.
11. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_SingleParentPercent
Row Name: Percent in household headed by single parent
Column Name:
Year: 2011
Field Note:
From Table S0901, 2008 American Community Survey.
12. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_TANFPercent
Row Name: Percent in TANF (Grant) families
Column Name:
Year: 2011
Field Note:
From Table 35. <http://www.acf.hhs.gov/programs/ofa/character/FY2008/tab35.htm>. The percentage for Other/Unknown is zero because while the numerator data source includes Other/Unknown, the denominator data source was zero. Race and ethnicity were reported under one measure in this data system.
13. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_MedicaidNo
Row Name: Number enrolled in Medicaid
Column Name:
Year: 2011
Field Note:
Georgia Medicaid program data. Race and ethnicity are reported under one measure in the data system. Hispanic enrollees (44,728 in CHIP and 5,012 in Medicaid) are included in the total but not in the race breakdown.
14. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_SCHIPNo
Row Name: Number enrolled in SCHIP
Column Name:
Year: 2011
Field Note:
Georgia Medicaid program data. Race and ethnicity are reported under one measure in the data system. Hispanic enrollees (44,728 in CHIP and 5,012 in Medicaid) are included in the total but not in the race breakdown.
15. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_FoodStampNo
Row Name: Number enrolled in food stamp program
Column Name:
Year: 2011
Field Note:
Using Race and Age Tables from <http://www.dfcsdata.dhr.state.ga.us/menusearch06.asp>, the total participants in the food stamp program were calculated. To get the number 18-19 the count of 18-21 was divided by two and added to those <18. Ethnic distributions for participants in the food stamp program were then applied to this count to get ethnicity specific counts.
16. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_WICNo
Row Name: Number enrolled in WIC

Column Name:**Year:** 2011**Field Note:**

Georgia WIC program data. Includes infants and children 0-5 and prenatal, breastfeeding, and non-breastfeeding women 11-19 served by WIC.

17. Section Number: Form21_Indicator 09B**Field Name:** HSIEthnicity_JuvenileCrimeRate**Row Name:** Rate (per 100,000) of juvenile crime arrests**Column Name:****Year:** 2011**Field Note:**

Georgia Department of Juvenile Justice (DJJ) data: Number of intake admissions. Data accessed at <http://www.djj.state.ga.us/Statistics/rptstatDescriptive.asp?type=State>. The percentage for Other/Unknown is zero because while the numerator data source includes Other/Unknown, the denominator data source is zero. American Indian/Native Alaskan, Asian, Native Hawaiian/Other Pacific Islander, and Multiracial are zero because these were not reported by DJJ. Race and ethnicity were reported under one measure in this data system.

18. Section Number: Form21_Indicator 09B**Field Name:** HSIEthnicity_DropOutPercent**Row Name:** Percentage of high school drop-outs (grade 9 through 12)**Column Name:****Year:** 2011**Field Note:**

Data from the Georgia Department of Education (school year), and accessed at www.gadoe.org/ReportingFW.aspx?PageReq=1023&StateId=ALL&T=1. Race and ethnicity were reported under one measure in this data system.

19. Section Number: Form21_Indicator 09A**Field Name:** HSIRace_FosterCare**Row Name:** Number living in foster home care**Column Name:****Year:** 2011**Field Note:**

Race and ethnic breakdown of the data were not available, so the national distribution, from the FFY2008 aFCARS report were applied to the Georgia total count. http://www.acf.hhs.gov/programs/cb/stats_research/afcars/tar/report16.htm. Race and ethnicity were reported under one measure in the data system.

20. Section Number: Form21_Indicator 09B**Field Name:** HSIEthnicity_FosterCare**Row Name:** Number living in foster home care**Column Name:****Year:** 2011**Field Note:**

Race and ethnic breakdown of the data was not available, and so the national distribution, from the FFY2008 aFCARS report were applied to the Georgia total count. http://www.acf.hhs.gov/programs/cb/stats_research/afcars/tar/report16.htm. FORM 12
TRACKING HEALTH OUTCOME MEASURES
[SECS 505 (A)(2)(B)(iii) AND 506 (A)(2)(A)(iii)]
STATE: GA

Form Level Notes for Form 12

None

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: GA

SP(New for Needs Assessment cycle 2011-2015) # 1

PERFORMANCE MEASURE: Percent of high school students who are obese (BMI > or = 95th percentile)

STATUS: Active

GOAL To reduce obesity among high school students.

DEFINITION Percent of high school students who are obese.

Numerator:
Number of high school students who are obese.

Denominator:
All students enrolled in high school.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE Objective 19-3.
Reduce the proportion of children and adolescents who are overweight or obese. Target - 5% among adolescents ages 12 to 19.

DATA SOURCES AND DATA ISSUES Youth Risk Behavior Survey. Survey is only conducted every other odd year. Projections will be used in even years.

SIGNIFICANCE The problem of childhood obesity in the United States has grown considerably in recent years. Between 16 and 33 percent of children and adolescents are obese. Obesity is among the easiest medical conditions to recognize but most difficult to treat. Unhealthy weight gain due to poor diet and lack of exercise is responsible for over 300,000 deaths each year. The annual cost to society for obesity is estimated at nearly \$100 billion. Overweight children are much more likely to become overweight adults unless they adopt and maintain healthier patterns of eating and exercise.

PERFORMANCE MEASURE:	Infant mortality rate among infants born weighing 1,500 grams or more who survive past the first 27 days of life
STATUS:	Active
GOAL	To reduce infant mortality in the "Infant Health" cell of the standard PPOR map.
DEFINITION	<p>Infant mortality rate specific to infants weighing 1,500 grams or more at birth and who survive past the first 27 days of life.</p> <p>Numerator: Infant deaths among infants weighing 1,500 grams or more at birth and who survive past the first 27 days of life.</p> <p>Denominator: All live births</p> <p>Units: 1000 Text: Rate</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>Objective 16-1a Reduce infant deaths. Target - 4.1 infant deaths per 1,000 infant deaths and fetal deaths of at least 20 weeks gestational age.</p> <p>Note that state performance measure is a sub-measure of feto-infant mortality.</p>
DATA SOURCES AND DATA ISSUES	Linked infant birth-death file to determine the numerator. Natality file to determine the denominator.
SIGNIFICANCE	Infants deaths that occur among infants weighing 1,500 grams or more at birth and who survive past the first 27 days of life are highly susceptible to interventions including safe sleep, infant injury prevention, car seat use, and breastfeeding.

PERFORMANCE MEASURE:	Number of abstracts submitted, reports prepared, presentations made, and publications submitted for peer review where MCHP staff are authors or coauthors
STATUS:	Active
GOAL	To increase epidemiologic capacity and dissemination of data to support programmatic improvements and evaluations.
DEFINITION	<p>Number of abstracts submitted, reports prepared, presentations made, and publications submitted for peer review.</p> <p>Numerator: Not applicable</p> <p>Denominator: Not applicable</p> <p>Units: No Text: Text</p>
HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	This is a numeric measure and does not have a numerator or denominator. The data source will be program data collected by the MCH Epidemiology Section.
SIGNIFICANCE	To contribute to improved decision-making based on data and information, improved MCH epidemiology capacity is needed and improved dissemination of basic data and more sophisticated analyses needed.

PERFORMANCE MEASURE:	Deaths to children ages 15 to 17 years caused by motor vehicle crashes per 100,000 children
STATUS:	Active
GOAL	To reduce the rate of motor vehicle crash mortality among older adolescents (15 to 17 years of age).
DEFINITION	<p>The rate of deaths to children aged 15 to 17 years caused by motor vehicle crashes per 100,000 children.</p> <p>Numerator: Number of motor vehicle deaths among adolescents 15 to 17 years of age.</p> <p>Denominator: All adolescents ages 15 to 17 years.</p> <p>Units: 1000 Text: Rate</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>Objective 15-15</p> <p>Reduce deaths caused by motor vehicle crashes. There is no target specific to the age-group addressed by this performance measure.</p>
DATA SOURCES AND DATA ISSUES	Mortality file.
SIGNIFICANCE	Motor vehicle crashes are the leading cause of death in all age groups. While motor vehicle crash deaths for children 14 years and younger is addressed through a national performance measure, older adolescent, who are often the operators of motor vehicles, require different interventions.

PERFORMANCE MEASURE:	Among children five years of age and younger who received services through the MCH Program, the percent who received a developmental screen
STATUS:	Active
GOAL	Increase the number of children throughout Georgia who receive a standard developmental screen.
DEFINITION	<p>The percent of children receiving WIC, CMS, BCW, and Children First services who receive a standard developmental screen.</p> <p>Numerator: Number of children receiving services in WIC, Children's Medical Services, Babies Can't Wait, and Children 1st who receive a standard developmental screen.</p> <p>Denominator: Number of children receiving services in WIC, Children's Medical Services, Babies Can't Wait, and Children 1st.</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	Program data. MCH Program will need to ensure that there is a method for recording the administration of a developmental screen and the outcome.
SIGNIFICANCE	HHS recommends developmental screening for all infants and young children as part of routine medical care. Key efforts include raising awareness and knowledge; improving developmental screening; changing systems to improve availability of early identification, diagnosis, and services; and monitoring the benefits, usage, and outcomes of early identification.

PERFORMANCE MEASURE:	Percent of pediatricians and family physicians who have positive attitudes toward treating children with special health care needs
STATUS:	Active
GOAL	To improve pediatricians and family physicians attitudes toward treating children with special health care needs.
DEFINITION	<p>The percent of pediatricians and family physicians who have positive attitudes toward treating children with special health care needs.</p> <p>Numerator: Not applicable</p> <p>Denominator: Not applicable</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	Through collaboration with partnering professional societies, an annual survey will be developed and administered. A definition of "positive attitudes" will be developed. The survey will yield a percent of those who complete the survey who have positive attitudes. Numerator and denominator are not applicable.
SIGNIFICANCE	Improved care and family involvement in the medical care and planning for children with special health care needs is facilitated by improved provider attitudes.

PERFORMANCE MEASURE:

Percent of very low birth weight infants (<1,500 grams at birth) enrolled in First Care

STATUS:

Active

GOAL

To ensure improved outcomes and reduced infant mortality among infants born weighing less than 1,500 grams.

DEFINITION

Percent of very low birth weight infants enrolled in First Care.

Numerator:

Number of infants weighing less than 1,500 grams receiving services through First Care.

Denominator:

Number of infants born weighing less than 1,500 grams receiving services through First Care.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Program data for the numerator. Natality data for the denominator.

SIGNIFICANCE

Infants born weighing less than 1,500 grams are at greatest need of services and intervention. First Care helps to ensure that families can navigate the early postpartum period to contribute to lower health care costs and reductions in infant mortality.

PERFORMANCE MEASURE:	Percent of women of reproductive age who consume an appropriate amount of folic acid prior to pregnancy
STATUS:	Active
GOAL	Reduce the occurrence of neural tube defects and spina bifida in Georgia.
DEFINITION	<p>Percent of women who have an unintended pregnancy who took multivitamin/folic acid in month prior to pregnancy.</p> <p>Numerator: Number of women who have an unintended pregnancy who took multivitamin/folic acid in month prior to pregnancy.</p> <p>Denominator: Number of women who have an unintended pregnancy.</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>Objective 16-16</p> <p>Increase the proportion of pregnancies begun with an optimum folic acid level. Target - 80%.</p>
DATA SOURCES AND DATA ISSUES	Georgia Pregnancy Risk Assessment Monitoring System (PRAMS)
SIGNIFICANCE	Approximately 50% of pregnancies affected with neural tube defects may be prevented with adequate consumption of folic acid from one month prior to conception through the third month of pregnancy.
